

# Participatory Planning for Climate Compatible Development in Maputo, Mozambique: A Guide for Local Governments

Climate change is one of the most pressing challenges facing the world today. Its impacts are already being felt in all parts of the globe, and they are expected to become even more severe in the future. Mozambique is particularly vulnerable to climate change, as it is located in a region that is prone to extreme weather events. Rising sea levels, droughts, floods, and storms are all becoming more common in Mozambique, and they are having a devastating impact on the country's economy and its people.

The city of Maputo is particularly vulnerable to climate change. It is located on the coast, and it is exposed to rising sea levels and storm surges. The city is also home to a large population of poor and vulnerable people, who are particularly at risk from the impacts of climate change.

In response to the challenges of climate change, the government of Mozambique has developed a National Climate Change Adaptation and Mitigation Strategy. The strategy includes a number of measures to help the country adapt to the impacts of climate change and to mitigate its greenhouse gas emissions. One of the key pillars of the strategy is participatory planning. This means involving local communities in the planning and implementation of climate change adaptation and mitigation measures.

Participatory planning is essential for ensuring that climate change adaptation and mitigation measures are effective and sustainable. It allows local communities to identify their own needs and priorities, and it helps to build ownership and support for climate change initiatives.

This book provides a comprehensive guide to participatory planning for climate compatible development in Maputo. It covers a wide range of topics, including:

\* Climate change adaptation and mitigation \* Disaster risk reduction \* Sustainable urban development \* Participatory planning principles and methods \* Case studies from Maputo

This book is written in a clear and concise style, and it is packed with practical examples and case studies. It is an essential resource for local governments and other stakeholders working to build more resilient and sustainable communities in Maputo.

## **Chapter 1: Climate Change and Maputo**

This chapter provides an overview of climate change and its impacts on Maputo. It discusses the city's vulnerability to climate change and the challenges that it faces in adapting to the impacts of climate change.

## **Chapter 2: Participatory Planning Principles and Methods**

This chapter discusses the principles of participatory planning and the different methods that can be used to involve local communities in the planning process. It provides guidance on how to design and implement participatory planning processes, and it discusses the challenges and opportunities of participatory planning.

## **Chapter 3: Climate Change Adaptation in Maputo**

This chapter discusses the different ways that Maputo can adapt to the impacts of climate change. It provides case studies of successful adaptation projects, and it outlines the key principles of climate change adaptation.

## **Chapter 4: Disaster Risk Reduction in Maputo**

This chapter discusses the different ways that Maputo can reduce its risk of disasters. It provides case studies of successful disaster risk reduction projects, and it outlines the key principles of disaster risk reduction.

## **Chapter 5: Sustainable Urban Development in Maputo**

This chapter discusses the different ways that Maputo can develop in a sustainable way. It provides case studies of successful sustainable development projects, and it outlines the key principles of sustainable urban development.

## Chapter 6: Participatory Planning for Climate Compatible Development in Maputo

This chapter brings together the different strands of the book and provides a comprehensive guide to participatory planning for climate compatible development in Maputo. It discusses the different steps involved in the participatory planning process and provides guidance on how to develop and implement climate compatible development plans.

Climate change is a serious challenge, but it is also an opportunity to build a more sustainable and resilient future. Participatory planning is essential for ensuring that climate change adaptation and mitigation measures are effective and sustainable. This book provides a comprehensive guide to participatory planning for climate compatible development in Maputo. It is an essential resource for local governments and other stakeholders working to build a more resilient and sustainable future for the city.
